WHY COMPREHENSIVE MOSQUITO, FLEA & TICK CONTROL IS CRITICAL

- Helps prevent disease
- Avoids allergies and irritation
- Reduces itchiness and scratching
- Boosts comfort and enjoyment
- Promotes pet health
- Balances ecosystem

Additionally, pest infestations can lead to increased health care costs, veterinary bills and decreased productivity. Bottom line, comprehensive mosquito, flea and tick control is vital for safeguarding personal, family and public health, protecting pets and improving quality of life.

1 PROGRAM SERVICE COMBINES 3 PEST SOLUTIONS FOR TOTAL COVERAGE

MOSQUITO CONTROL

We guarantee our conventional and 100% natural applications for 21 days. This includes a mosquito larvicide treatment for surface water to prevent mosquito larvae from maturing into adults.

FLEA CONTROL

Fleas are mostly found on dogs and cats, but are known to attach themselves to humans by leaving bites that can create open sores.

Our Defender[®] Pest flea control treatments help eliminate or control active pests and stop new pests from roaming into your yard.

TICK CONTROL

Ticks should find no safe harbor in or around your home as they transmit diseases to humans that can cause serious complications. Our Defender[®] Pest tick treatment will target those locations where tick control products can be successfully applied. This includes ground cover vegetation, flower beds and shrubs and other areas, plus attached wooded areas along the property boundary.

Guaranteed Great[™]

We guarantee results. If the pests come back, so do we with FREE service calls as needed between applications.

Plus, our work is backed by our Pledge of Excellence:

1. We will provide service when we say we will
2. We will always apply only quality products to your property
3. We will generate a detailed analysis after each service
4. We will leave your property in better condition than we found it
5. We will complete service calls within 2 business days
6. We will always be in uniform and have a clean and professional appearance
