PROTECT YOUR FAMILY, HOME AND POCKETBOOK WITH NEW TRI-ANNUAL PEST CONTROL

Our NEW Tri-Annual 360° Pest Control Program from Defender[®] Pest starts with an assessment of your home and property, then treats the perimeter of your home creating a protective barrier 3 feet up and 3 feet out that includes your foundation, doors and windows, plus all of your soffits. Our goal is to either eliminate or prevent the following pests:

- House ants
- Carpenter ants
- Bees and Wasps*
- Hornets
- Ground and carpet beetles
- Centipedes
- Cluster moths
- Clover mites
- Cluster flies
- Crickets
- Camel/cave crickets
- Earwigs
- Millipedes
- Pill bugs
- Mice and rats
- Silverfish
- Sowbugs
- Springtails
- Spiders

*Excluding cicada killers and honeybees

- Perimeter pest control is an industry best practice to prevent pest infestations, protect your property and maintain a pest-free environment without sole reliance on interior treatments
- We will treat your home three times from spring, when insects start to get active, through early fall when cooler temperatures send pests packing for a warm place to stay.

WHY TRI-ANNUAL?

Year-Round Pest Control is a Smart Investment in Health, Safety and Damage Prevention for Several Reasons:

- Consistent Protection
- Cost Savings
- Health and Safety
- Property Preservation
- Environmental Responsibility
- Peace of Mind

Guaranteed Great[™]
